

# Mockito

E-Portfolio - Nikolas Traut - 04.05.2018

# About Mockito

- Mocking framework for Java
- Used with JUnit
- Creation of mock objects

# Why use a mocking framework?

- Abstracting Dependencies:
  - Legacy Code
  - Calls to data access layer
  - External services
  - Non-deterministic results

# The golden rules of mocking

- Do not mock types you don't own
- Don't mock value objects
- Don't mock everything

# Live-Demo
